Texas A&M hosts process safety meeting

Texas A&M University at Qatar (TAMUQ) and ConocoPhillips Qatar Petroleum Inc. co-hosted the Process Safety Symposium titled: “The Importance of Leadership Commitment in Making Safety a Core-must.”

The symposium was attended by more than 500 participants from Qatar and abroad, representing industry, academia, government and the regulatory institutions. Participants exchanged knowledge on topics including technical case studies, best practices in process safety, research on process safety, incident case studies, safety analysis case studies, chemical engineering, and environmental and health and safety.

The Process Safety Symposium is a wonderful opportunity for industry professionals to discuss their experiences, improve their knowledge, and enhance their technical and professional skills.

The symposium’s organising committee chair Dr Luc Nester, assistant professor and senior research specialist in the Process Safety Centre, said: “The Process Safety Symposium represents a wonderful opportunity to bring together to share. The symposium aims to promote it is to talk about it.”

During the event, Qatar Petroleum also presented a paper on oil spill and emergency response to the symposium. The paper highlighted the company’s commitment to safety and environmental protection. The company is dedicated to achieving zero harm to people, the environment, and the community. The paper also outlined the measures taken to prevent and respond to oil spills, emphasizing the importance of proactive planning and preparedness.

ConocoPhillips Qatar president Erec Isaacson said: “The symposium allows us to discuss and share safety knowledge and experiences. It also provides a platform for us to learn from each other and improve our safety practices. The event was well-attended, with representatives from various industries and organizations.”

The symposium also featured several keynote speeches from industry professionals, including Dr Luc Nester, assistant professor and senior research specialist in the Process Safety Centre, and Dr Mark Hefner, dean and chief executive officer of TAMUQ.

The event was supported by various sponsors, including ConocoPhillips Qatar, Qatar Petroleum, and the Qatar National Research Fund. The programme was organised by the TAMUQ Process Safety Centre and the Qatar National Research Fund.

The symposium was attended by representatives from industry, academia, government, and the regulatory institutions. The event featured several keynote speeches from industry professionals, as well as sessions on various topics related to process safety.

The symposium also featured a visit to the Texas A&M University at Qatar campus, where participants had the opportunity to tour the facility and learn about the university’s research and educational programmes.
